

FRISENETTE

LABORATORY
FILTRATION PRODUCTS
& CONSUMABLES

Introduction

We are proud to present this fourth issue of our catalogue with Frisenette products.

Frisenette ApS was founded in 1931 and is a leading manufacturer and distributor of filters, filtration equipment and consumables for laboratory use. Together with our suppliers we strive to assure customer access to the latest developments in laboratory filtration and consumables. This is reflected in our large and diversified product range which meets the requirements in any modern laboratory.

Our products are widely used in the pharmaceutical industry, public health, life science, chemical industry, food and beverage industry, environmental laboratories and the electronics industry. It is our aim to offer our customers highly competitive products and the best service.

Frisenette ApS is located in Knebel, Denmark

Beside our own brands, AGF® Filter papers, Q-Max® Syringe filters and MontaMil® Membrane filters, we are promoting products from ADVANTEC Toyo Roshi Kaisha Ltd., GE Healthcare (Whatman), Macherey-Nagel GmbH & Co. KG, Nerbe Plus, Corning Gosselin SAS, Deltalab S.A., Kima s.a.s. and Guangzhou Jet Bio-Filtration.

This catalogue includes our own range of laboratory filtration products: Q-Max® Syringe filters, MontaMil® Membrane filters, Glass- and Quartz fiber filters, Qualitative and Quantitative filter papers, filter holders, pH papers, pH strips and other paper based products.

In the catalogue you will find basic technical information for each product type. If you need any further information please do not hesitate to contact us or your local supplier of our products.

Table of Contents

Syringe Filters	6
Vent Filters	15
Centrifuge Filters	16
Membrane Filters	18
Filter Cassettes	27
Qualitative Filter Papers	28
Quantitative Filter Papers	29
Glass Fiber Filters	30
Quartz Fiber Filters	31
Filter Holders	32
Extraction Thimbles	34
Lens & Weighing Papers – Milk Filters	35
Seed Testing Papers	36
pH Test	37

Q-Max® RR Syringe Filters

Q-Max® RR Syringe Filters

- This second generation of **Q-Max®** syringe filters, **Q-Max® RR**, consists of 13 mm and 25 mm filters with a choice of seven different built-in filtration media.
- Choose between six membrane types and two types of glass micro fibers (GF).
- Each filtration media type*, has its own colour code. Pore size (nominal retention for GF) is printed on each filter.
- **Q-Max® RR** syringe filters are supplied in plastic jars with 100 pcs. and in bulk packed boxes with 500 pcs.
- All **Q-Max® RR** syringe filters undergoes HPLC extractable tests.
- **Q-Max® RR** syringe filters are manufactured in accordance with ISO 9001.

* Both types of PTFE, hydrophobic and hydrophilic, have the same colour.

Specifications

	Q-Max® RR 13	Q-Max® RR 25
Housing material	Polypropylene	Polypropylene
Filtration area [cm ²]	0.92	2.98
Hold-up volume [µl]	<10	<30
Max. operating temp [°C]	50	50
Max. operating pressure [bar]	6	6
Recommended sample volume [ml]	<10	<50
Connections [inlet/outlet]	Female luer lock/male luer	Female luer lock/male luer

Q-Max® RR NY

Nylon – naturally hydrophilic and mechanically strong membrane type with a low level of extractables. Suitable for filtration of aqueous and solvent based samples which makes this type ideal and a good choice for filtration of HPLC samples.

Size [mm]	Pore Size [µm]	Packing [pcs.]	Cat. No.
13	0.22	100	13NY022-100

25	0.45	100	25NY045-100
25	0.45	500	25NY045-500

Q-Max® RR CA

Cellulose Acetate membrane – ideal for filtration of aqueous based liquids, most alcohols and liquids containing proteins. CA membranes are considered as being the lowest protein binding membrane type available.

Size [mm]	Pore Size [µm]	Packing [pcs.]	Cat. No.
13	0.22	100	13CA022-100

25	0.45	100	25CA045-100
25	0.45	500	25CA045-500

Q-Max® RR PES

PES – Polyethersulphone membrane is a naturally hydrophilic membrane type and is among the most porous types available. Furthermore, this type is asymmetrical, which means that the pores are larger on the inlet side which gives a high throughput. It is ideal for filtration of aqueous based samples and has a low protein binding. PES is also recommended for ion chromatography.

Size [mm]	Pore Size [µm]	Packing [pcs.]	Cat. No.

SYRINGE FILTERS

Q-Max® RR Syringe Filters

Q-Max® RR PVDF

Polyvinylidene Difluoride membrane – slightly hydrophobic. Good solvent and acid resistance makes this type suitable for filtration of HPLC samples. Not recommended for filtration of aqueous based samples.

Size [mm]	Pore Size [µm]	Packing [pcs.]	Cat. No.
13	0.22	100	13PV022-100

SYRINGE FILTERS

Q-Max[®] GPF Syringe Filters

Q-Max[®] GPF Syringe Filters

- **Q-Max[®] GPF** 25 mm syringe filters with built-in glass fiber pre-filters are specially designed to filter samples with many particles.
- Available with Cellulose Acetate membranes for aqueous based liquids and Nylon membranes for solvents and/or aqueous based liquids.
- Pore sizes 0.22 μm and 0.45 μm .
- Available in boxes of 100 pcs. or bulk packed in boxes of 500 pcs.

Specifications

	Q-Max [®] GPF
Housing material	Polypropylene
Filtration area [cm ²]	2.98
Hold-up volume [μl]	<30
Max. operating temp [°C]	50
Max. operating pressure [bar]	6
Recommended sample volume [ml]	<100
Connections [inlet/outlet]	Female luer lock/male luer

Q-Max® CA-LS & Q-Max® CA-Plus Sterile Syringe Filters

Q-Max® CA-LS

- Sterile 25 mm syringe filters with low protein binding Cellulose Acetate membranes.
- Main application is sterile filtration of aqueous solutions in volumes up to approx. 50 ml.
- Available pore sizes are 0.22 µm and 0.45 µm.
- Q-Max® CA-LS syringe filters are sterilized by radiation and are manufactured in accordance with ISO 9001.

Q-Max® CA-Plus

- Sterile 25 mm syringe filters with low protein binding Cellulose Acetate membranes and built-in glass fiber pre-filter.
- Main application is sterile filtration of aqueous solutions in volumes up to approx. 100 ml.
- Available pore sizes are 0.22 µm and 0.45 µm.
- Q-Max® CA-Plus syringe filters are sterilized by radiation and are manufactured in accordance with ISO 9001.

Specifications

	Q-Max® CA-LS	Q-Max® CA-Plus

SYRINGE FILTERS

Q-Max[®] PES Sterile Syringe Filters

Q-Max[®] PES

Q-Max[®] PES sterile 25 mm syringe filters with low protein binding Polyethersulfone (PES) membranes.

- Main application is sterile filtration of aqueous solutions in volumes up to approx. 50 ml.
- Available pore sizes are 0.22 μm and 0.45 μm .
- Q-Max[®] PES syringe filters are sterilized by radiation and are manufactured in accordance with ISO 9001.

Specifications

Q-Max® CA and CA-Plus Syringe Filters

Q-Max® 30 mm CA syringe filter with a filtration area which is approximately 50% larger than in standard 25 mm Q-Max® syringe filters.

Available with Cellulose Acetate membrane which is ideal for filtration of aqueous based liquids and some alcohols.

Q-Max® 30 mm CA

- Pore size 0.45 µm
- Available in packs of 100 pcs. and in bulk packs of 500 pcs.

Q-Max® 30 mm CA-Plus

- Built-in glass fiber pre-filters increases the total throughput.
- Pore size 0,22 and 0.45 µm (membrane)
- Available in packs of 100 pcs.

Specifications

	Q-Max® 30 mm CA	Q-Max® 30 mm CA-Plus
Housing material	Polypropylene	Polypropylene
Filtration area [cm ²]	4.6	4.9
Hold-up volume [µl]	<100	<150
Max. operating pressure [bar]	5	6
Connections [inlet/outlet]	Female luer lock/male luer	Female luer lock/male luer

SYRINGE FILTERS

Q-Max® 4 mm Syringe Filters

- For volumes <1 ml
- Low hold up volume
- Six different membrane materials
- Pore sizes 0.22 and 0.45 µm
- Packings of 200 pcs.

Specifications	
Housing material	Polypropylene
Filtration area [cm ²]	0.125
Hold-up volume [µl]	<5
Max. operating pressure [bar]	6
Recommended sample volume [ml]	<1
Connections [inlet/outlet]	Female luer lock/Male luer

Membrane Types

Cellulose Acetate	Hydrophilic low protein binding membrane. Suitable for aqueous solutions and most alcohols.
Nylon	Hydrophilic and versatile membrane. For aqueous and most solvent based solutions e.g. Methanol and Acetonitrile.
Polyethersulfone	Hydrophilic low protein binding membrane. For aqueous and solvent based solutions. Broad pH resistance.
PVDF	Hydrophobic membrane suitable for filtration of solvents and some acids. Not recommended for filtration of water samples.
PTFE, hydrophobic	Suitable for filtration of strong solvents, acids and bases. Not recommended for filtration of water samples.
PTFE, hydrophilic	Very versatile membrane type. Used for filtration of water, solvents, acids and bases.

50 mm Vent Filter

Applications

- Sterile venting of vessels e.g. carboys, fermenters etc.
- In-line sterilization of and particulate removal from air and gasses
- Autoclave venting
- Water trap
- Filtration of gas for incubators
- Filtration of non-aqueous fluids

Specifications

50 mm Vent Filter	
Filter Media	Hydrophobic PTFE reinforced with polypropylene
Pore Size [µm]	0.22 or 0.45
Housing	Polypropylene
Connections	6-12 mm stepped hose barb
Filter area [cm ²]	19.6
Air flow rate 0.20 µm	27 L/min at 1 bar
Air flow rate 0.45 µm	32 L/min at 1 bar
Housing diameter [mm]	63
Housing length [mm]	53
Max. pressure	3.5 bar (approx. 50 psi)
Autoclavable	up to 10 times – 121°C for 20 min.

CENTRIFUGE FILTERS

Micro-, Midi- and Maxi-Spin

- Made of polypropylene.
- Maxi-Spin with screw cap made of high density polyethylene.
- Volumes are max. volumes.
- Working volumes should be less than stated.
- All types are available with eight types of micro-filtration membranes with two pore sizes.

Micro-Spin	Midi-Spin	Maxi-Spin
Hold-up volume: <math><5 \mu\text{l}</math>	Hold-up volume: <math><10 \mu\text{l}</math>	Hold-up volume: <math><20 \mu\text{l}</math>

900 μl filter insert and 2 ml tube with hinged cap	5 ml filter insert and 7 ml tube with hinged cap	25 ml filter insert and 50 ml tube with screw cap

Membrane Types

Nylon	Naturally hydrophilic type with broad solvent resistance. Can also be used for filtration of aqueous samples (pH 3-10) and for commonly used chemicals e.g. Methanol and Acetonitrile.
Polyethersulfone (PES)	Hydrophilic and low protein binding type. Resists pH 1-14.
PVDF	Hydrophilic and low protein binding membrane type. Suitable for both solvent and aqueous liquids. Acid resistant.
Regenerated Cellulose (RC)	Hydrophilic and low protein binding membrane type. Suitable for both solvent and aqueous liquids.
PTFE	Hydrophobic membrane. Resists strong solvents, acids and bases. Not suitable for aqueous samples.
Polypropylene (PP)	Hydrophobic and solvent resistant membrane. Ideal for filtration of samples prior to ion-chromatography.
Cellulose Acetate (CA)	Hydrophilic and low protein binding. For aqueous samples. Also resistant to some alcohols.
Nitro Cellulose (NC)	Hydrophilic (wetting agent added) membrane type. For aqueous samples. Binds proteins.

MEMBRANE FILTERS

MontaMil® CA Membrane Filters

- MontaMil® Cellulose Acetate (CA) membrane filters are made from pure cellulose acetate modified to be the lowest binding filter available.
- The extremely low binding characteristics provide the highest throughput when filtering solutions containing proteins.
- CA is considered as being the lowest protein binding membrane type available.
- CA membrane filters are relative strong and contain only a small amount of aqueous extractables.
- Diameters 25 mm and 47 mm.
Two pore sizes available.
- Autoclavable.

Features

- Lowest binding material available
- High throughput
- Strong and dimension stable
- Uniform pores

Applications

- Filtration and sterilization of protein and enzyme solutions
- Tissue culture media sterilization
- General filtration of aqueous solutions
- Filtration of most alcohols

MontaMil® MCE Membrane Filters

- Mixed Cellulose Ester (MCE) is a mixture of Cellulose Nitrate and Cellulose Acetate.
- By adding Cellulose Acetate the surface of the membrane becomes smoother and more uniform than membranes made of pure Cellulose Nitrate.
- MCE membrane filters are one of the most porous membrane types available.
- Available as plain white.
- Diameters 25 mm and 47 mm.
Eight pore sizes available.
- Autoclavable.

Features

- High porosity
- High purity
- Biological inert

Applications

- Clarification and sterilization of aqueous liquids
- Particle analysis
- Air analysis

MEMBRANE FILTERS

MontaMil® Nylon Membrane Filters

- MontaMil® Nylon membranes are naturally hydrophilic and will only release a negligible amount of extractables.
- Versatile – can be used for filtration of both aqueous liquids and most common solvents.
- MontaMil® Nylon membranes are plain white.
- Diameters 25 mm and 47 mm.
Two pore sizes available.
- Autoclavable.

Features

- Naturally hydrophilic
- Very strong
- Low level of extractables

Applications

- HPLC solvent filtration and degassing
- General filtration of solvents

MontaMil® PVDF Membrane Filters

- This type of MontaMil® PVDF is slightly hydrophobic. This means that the liquid to be filtered must contain min. 30% organic solvent to ensure a proper filtration.
- Resistant to common solvents and several acids.
- It is not recommended to filter aqueous liquids with this type.
- Diameter 47 mm. Two pore sizes available.
- Autoclavable.

Features

- Strong
- Low level of extractables
- Good solvent and acid resistance

Applications

- Filtration and degassing HPLC mobile phases
- General solvent filtration

Specifications

Pore Size [µm]	Thickness [µm]	Bubble Point [bar]	Air Flow Rate [ml/min/cm²]	Porosity [%]

MEMBRANE FILTERS

MontaMil® PVDF-M Membrane Filters

- Hydrophilic PVDF membrane type.
- MontaMil® PVDF-M is a low protein binding membrane.
- Versatile – can be used for filtration of aqueous liquids and most organic solvents. Also resistant to several acids.
- Diameter 47 mm. Two pore sizes available.
- Autoclavable.

Features

- Low protein binding
- Broad chemical resistance
- Strong

Applications

- Filtration and degassing HPLC mobile phases
- Filtration of liquids containing proteins
- General filtration of solvents

MontaMil® Plus Polycarbonate Membrane Filters

- Made from a thin film with precise cylindrical pores.
- Higher pore density compared with traditional polycarbonate membrane filters.
- Narrow pore size distribution
- Very smooth – all particles will be retained on the surface.
- Ideal for microscopy applications.
- Autoclavable.
- Available as translucent and black*.

*) Black membranes do not resist all types of immersion oils.
It is advised to test before use. E.g. Cargille immersion oil TYPE-A will work.

Features

- Surface retention
- Precise pore sizes
- Biologically inert
- Non-staining
- Non-hygroscopic

Applications

- Microbiology
- Microscopy
- Air analysis

MEMBRANE FILTERS

MontaMil® Polycarbonate Membrane Filters

- Absolute pore size
- Smooth, thin glass-like surface
- Superior strength
- Low extractables
- Negligible absorption/adsorption
- Available as white (translucent) and black (dark grey)

Features

- Surface retention
- Precise pore sizes
- Biologically inert
- Non-staining
- Non-hygroscopic

Applications

- Microbiology
- Microscopy
- Air analysis

MEMBRANE FILTERS

MontaMil® MCE Membrane Filters – Sterile

- Mixed Cellulose Ester (MCE) is a mixture of Cellulose Nitrate and Cellulose Acetate. By adding Cellulose Acetate the surface of the membrane becomes smoother and more uniform than pure Cellulose Nitrate.
- White membranes with black grids.
- Diameter 47 mm.
- Pore sizes 0.22 µm and 0.45 µm.
- Membranes are manufactured in accordance with ISO 9001 and comply with ISO 7704.

Features

- High porosity
- High purity – Triton-free
- Biological inert

Applications

- Microbiological control of water, beverages, pharmaceuticals

Sterile MCE white gridded

QUALITATIVE FILTER PAPERS

Qualitative Filter Papers

- Extremely pure filter paper made from almost 100% alpha cotton cellulose.
- Ash content approx. 0.06%.
- Four types with different filtration speed and retention characteristics available.
- Available as plain circles and pre-pleated ready to use.
- Boxes are clearly labeled with colour code, type, grade, filtration characteristics and retention efficiency.

Applications

- Clarify and remove precipitates
- Preparation for qualitative analysis

Quantitative Filter Papers

- Quantitative (ashless) filter papers are made from 100% cotton linters and are free from impurities since the paper is acid washed and cleaned with ultra pure water.
- The ash content is 0.007%.
- Four types with different filtration speed and retention characteristics.
- Available as plain circles and pre-pleated ready to use.
- Boxes are clearly labeled with colour code, type, grade, filtration characteristics and retention efficiency.

Applications

- Environmental analysis
- Gravimetric analysis

GLASS FIBER FILTERS

Glass Fiber Filters

- Glass fiber filters are made of 100% borosilicate glass without binder.
- Resist temperatures up to 500°C, have a good chemical resistance and are biological inert.
- Compared with filter papers glass fiber filters offer a high loading capacity, faster filtration speed and a more efficient filtration.
- Glass fiber filters should be used flat.

Specifications and application examples

Grade	Retention ¹ [µm]	Weight [g/m ²]	Thickness [mm]	Filtration speed ² [sec.]	Application examples
GA	1.6	52	0.26	60	Air analysis. Suspended solids in waste water according to EN872:2005
GB	1.0	143	0.70	200	Thick filter with good retention of difficult-to-filter suspensions

Quartz Fiber Filters

- Quartz Fiber Filters are made of 100% pure quartz and are binder-free.
- Quartz has an excellent temperature resistance, up to 900°C, and has low content of trace elements.

Applications

- Emission control
- Exhaust gas control
- Air pollution analysis

FILTER HOLDERS

Glass Filter Holders – 25 mm

- For 25 mm filters. Made of borosilicate glass.
- Choose between sintered glass support and stainless steel support.
- **Sintered glass support** for microbiological and particle analysis. Model 25-SG.
- **Stainless steel support** for producing a clean filtrate and for filtration of solutions containing proteins. Model 25-SS.
- Funnel capacity is 22 ml. Graduated to 15 ml.
- Holders are supplied complete with funnel, base, clamp and silicone stopper.
