## Filter Tips FT

**No sample contamination** - filters are made of virgin high-quality hydrophobic polyethylene without additives

**No pipette contamination** - filter provides reliable protection against contamination through micropore filter technology (MPF technology, filter pore size 10-40 µm)

**Universal fit and tip ejection** - optimised cone geometry for a secure fit

**Quick and easy volume check** - graduation marks on tip at standard volumes

**Precise pipetting without loss of sample** - conical tip opening prevents any formation of drops at the end of the tip

**Elimination of sample contamination** - tips made of non-wettable, virgin polypropylene

**Easy identification of pipette tips** - colour-coded racks allows the quick and easy identification of the pipette tip and a suitable pipette

**Maintain sample integrity** - sterile version available (beta irradiation)

**Versions** - available in bags and rack boxes

**Compatibility list** available on request
