

384 Well Plate

W,384 well plate,designed to fit LightCycler[®] 480 systems
White, Box of 40 plates

This fully skirted 384 well EU plate is designed to fit Roche LightCycler[®] 480 systems. Optimized for robotic high-throughput applications. Can be used in many 384 well block (q)PCR cycler models. See compatibility search engine at www.bioplastics.com. Plates are rigid, flat and stackable. Closure can be accomplished with one of the EU Seals (157300, 157200). Plates contain BPLPM technology. This product will be discontinued and replaced by its successor.

Article: B71519

Colour: White

Quantity: box of 40

Extra low DNA binding tubes:

- Extreme high efficiency
- Low copy detection
- Maximum sample recovery
- qPCR approved and identical raw material, high reproducibility
