

48-well (q)PCR plates

Easy to cut

B71601

B57651

B57651

Availability

- 0.1 ml low profile, semi skirted
 - 0.2 ml regular profile, non skirted
 - Frosted & white, laser marked
 - Light frosted, white & ultra clear
- For resp. high/highest S/N ratios in qPCR use light frosted/white

In short

- Semi skirted version can be cut per three rows offering flexible usage
- Sample identification
- Laser marking possibilities
- All 8-cap strips fit
- White plates maximize S/N ratios & avoid signal contamination from the block

Compatible cyclers

0.1 ml: Fits ABI StepOne, Veriti-Fast, Bio-Rad CFX, Chromo-4, (Mini) Opticon, Eppendorf Real Plex and many other PCR and qPCR cyclers.
0.2 ml: Fits almost all (q)PCR cyclers that accept regular profile products.

See compatibility list at www.bioplastics.com.

(q)PCR Perfect

Highly reproducible results
Low evaporation
Low binding
Stackable
No nesting
Robust
Pyrogen, DNase & RNase free

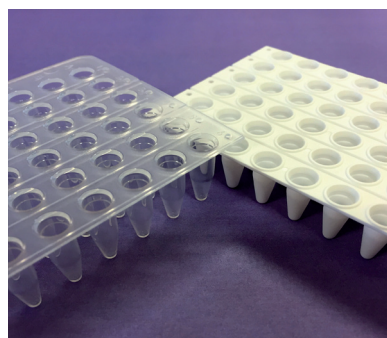

Products are designed and manufactured in The Netherlands. Samples on request.

Ordering information

48-well (q)PCR plates

	Light frosted	White	Ultra Clear	Packaging
48 x 0.1 ml semi skirted plate	B71601	B71609		50 plates
48 x 0.2 ml non skirted plate		B71509	B71501	50 plates
Closure options				
EU optical wide 8-cap strip	B57801			120 strips
Tear Off 8-cap strip mat	B57651			50 mats

Low- & Regular profile

B57801

B71609
