EU 0.1 ml 8-tube strip

LP,UC,SFGC,Extra Robust,accepts "Click-on Cap strip",Fits Shell Frame Grids (0.1 ml) Natural, Bag of 120 Strips

This strip can also be used in combination with the 8-single attachable indented cap strip (B79501). Fits almost all PCR and qPCR (fast) cycler models which accept low profile products such as ABI/LT Fast, Roche [®], Bio-Rad [®], Eppendorf [®] and others. See compatibility list at www.bioplastics.com. Designed for PCR and qPCR applications. For highest S/N ratios in qPCR the use of white or frosted products is recommended. Can be used with EU adaptors or can be positioned in specific (skirted) grids also called Shell Frame Grids and once "positioned in" becoming a plate assembly for specific (q)PCR instruments. There are four different grids available: To fit all ABI/LT

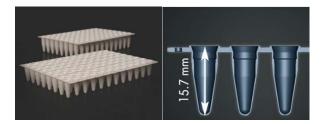

0.1 ml fast cyclers use grid AB19805G, to fit Roche LightCycler [®] 480 systems use grid B17489G and for making non skirted plates use grid B69304. See also: Shell Frame Grids. Closure can be accomplished with any EU 8-cap strip. For qPCR closure the use of B57801, B79701-1 or Optical Tear Off 8-Cap Strip Mat is recommended.

Article: K77001 Colour: Natural Quantity: bag of 120

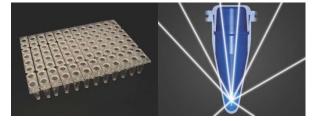

Low Profile Products:

- Optimized for qPCR
- Fits all cyclers with height adjustable lid
- Fits all fast cyclers
- Fits all 0.1 ml cyclers
- qPCR approved, identical raw material, high reproducibility

Ultra Clear Transparent Products:

- Extremely transparent
- Available for all types of (q)PCR vessels and Shell Frame Grids
- Recommended if optical qPCR signal is obtained through bottom of the tubes
- qPCR approved and identical raw material, high reproducibility

Extra low DNA binding tubes:

- Extreme high efficiency
- Low copy detection
- Maximum sample recovery
- qPCR approved and identical raw material, high reproducibility
