

ahn[®] reagent Reservoirs

10 mL | 25 mL | 50 mL

Construction - made out of a unique blend of Polystyrene

Extra large, sturdy base with broad edges - enable it to stand firmly on your workbench

Graduation marks - for easy, accurate dispensing / helps identify any remaining liquid

Angled interior supports the collection of the liquid and decreases reagent waste

Spillproof - no need to worry about spillage while you are processing liquids

Easy pouring - to store any remaining liquid you can empty the reservoir using the corners

Compact storage - the reservoirs are easy to stack and the lip at the bottom of the reservoir allows them to be easily separated from each other

Ideal for using with all AHN Single and Multi channel Pipettes

- to suit the various pipettes our reservoirs come in three different sizes:

- ① 10 mL, V-shaped bottom (ideal with 8- and 16-channel pipettes)
- ② 25 mL, flat bottom (ideal with multi channel pipettes)
- ③ 50 mL, V-shaped bottom (ideal with 12-channel pipettes)
